I Can Present

How to use

Guide #1

On the first screen, which is black and called projects, tap the plus sign in the top RH corner.

Open I Can Present using this icon.

Press the camera icon to see the view change

Position
Position your iPad so the camera is on the Left Side Landscape position.

Top Tip: Make Sure access to your camera roll is switched on for I Can Present in the privacy settings for Photos.

Kudlian
software

<http://www.kudlian.net>

Click at the top right.
done

Text
Tap the text on the right side and type 'Hello my name is...'

Customise
By touching the overlapping rectangles on the lower toolbar, experiment with 4 settings you might use when recording.

The settings icon gives access to the speed of the teleprompt, variation as to font, size and colour plus contrast with background.

Press record button to stop.

Record
Set the camera so that your face is visible.
Press record button in top right, wait for the countdown and read your text.

View
Wait until you see the following information message:

To see your film, touch the film reel in lower left corner to bring up the camera roll. Touch the video you want to watch. Press done on the camera roll when finished.
