

Installing the Software

You will need to have administrator access rights in order to install this software to your computer.

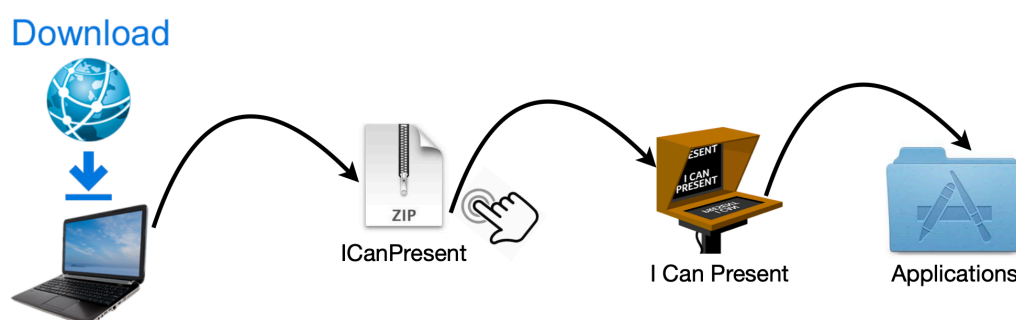

A password may be required as part of this process.

- Download the software to your computer from the Kudlian Software [website](https://www.kudlian.net) or through your Apple App store account;

[Kudlian Software Website](https://www.kudlian.net) <https://www.kudlian.net>

The download from our website is a standard compressed file, also known as a 'zip' file.

- Double click the I Can Present 'Zip' download file icon.

- Once the file has been decompressed just drag and drop it to your Applications folder.

The software will now be located into your applications folder and you will then be able to run and register the software. *(An internet connection is required to register the software on your computer).*

You will need to purchase a licence code to register I Can Present 3.

Demo Version

You may download I Can Present and install it to any suitable computer for the sole purpose of testing that the software is compatible with your system.

Initially I Can Present will work in 'Demo' mode. You will have full functionality, but exported movies have a watermark that cannot be removed.

A licence code is required to register the software and this then removes any watermarks, and any other restrictions, when projects are saved and movies exported².

* ² Watermarks cannot be removed from movies exported before I Can Present has been registered.

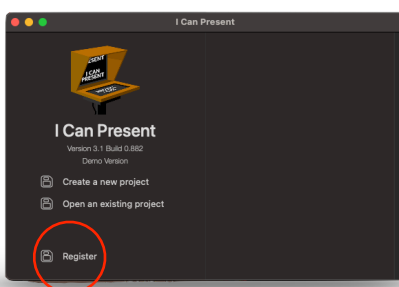

Licencing

You will require a valid licence code which can be purchased from Kudlian Software, or through one of our resellers. Software bought through the App Store will be registered during this and the installation process.

In the case of single machine licence codes, these are 'tied' to the computer that the software is installed and registered to. Once the licence code has been used on this computer it cannot then be reused on another computer unless you request a reset.

To register you must have an active internet connection to your computer.

- Run I Can Present 3
- Click on the Register option in the start up panel

- A web page will load.
- Enter your details in the spaces provided on the web page and click the REGISTER button.
- Follow the instructions carefully. An email will be sent to the email address you entered.
- Click on the link in the email sent to you, and then relaunch I Can Present.

Ooops!

If you get a message informing you that your licence code is invalid, then Strat again and check that you enter it correctly.

There are no letter O's in I Can Present licence codes and B's and 8's can look very similar.

If you receive a message telling you that the code has already been used, then I Can Present has already been installed and registered on another Mac computer. This might be because you have bought another computer or had a repair undertaken that affects the licence.

You need to determine where the licence has been used and uninstall it from that computer, then contact support@kudlian.net. We will require the licence code you wish to have reset and the serial number of the computer. (See below)

If you are unable to uninstall or are not sure where the software has been installed, then contact us for help.

How Do I?

Where to Get Help

You will find tutorials, hints, and other downloads for I Can Present on our website.

Use the online support for I Can Present;

You can download more resources such as background pictures and symbol sets.

'How to tutorials' will show you how to get started and some of those little tricks to get the best from I Can Present

<https://www.kudlian.net/products/icanpresent/tutorials.html>

Find the serial number of my Mac?

Click on the Apple logo in top left of your computer screen

From the menu that appears, choose 'About This Mac'.

A window will open giving details on your computer including the Serial Number
